

A clearer appointment starts here

A free, reusable pack for turning scattered notes into a focused conversation.

Juno Appointment Prep Pack

Use one page at a time. Write only what helps you remember and communicate. You do not need to complete every box.

Before

Choose the goal, changes, impact, and questions that matter most.

After

Write down decisions, owners, dates, and what to do if things change.

Free to print, copy, adapt, and import into Canva under the MIT licence.

Open source: github.com/MarshallBear1/juno-open-health-tools

1. Set the appointment focus

A short, prioritised brief is easier to use than a complete life history.

THE ONE OUTCOME THAT WOULD MAKE THIS APPOINTMENT USEFUL

THREE CHANGES TO MENTION

1

2

3

WHAT CHANGED IN DAILY LIFE

Use concrete examples: what takes longer, happens less often, needs help, or is no longer possible?

WHAT I WANT THE CLINICIAN TO UNDERSTAND

2. Find words that fit

Descriptors are communication prompts, not clues to a diagnosis.

SENSATION

- ☐ aching
- ☐ burning / hot
- ☐ cramping
- ☐ electric
- ☐ heavy
- ☐ numb
- ☐ pressure-like
- ☐ sharp
- ☐ tight
- ☐ tingling
- ☐ throbbing

TIMING

- ☐ constant
- ☐ intermittent
- ☐ sudden
- ☐ gradual
- ☐ episodic
- ☐ delayed after activity
- ☐ builds through the day

PATTERN

- ☐ localised
- ☐ spreading
- ☐ moving
- ☐ one-sided
- ☐ symmetrical
- ☐ changed by position
- ☐ unpredictable

IMPACT

- ☐ interrupts sleep
- ☐ limits concentration
- ☐ slows walking
- ☐ requires a rest
- ☐ prevents usual tasks
- ☐ needs help

ONE SENTENCE I COULD USE

"It feels _____ around _____. It is _____ and affects _____."

3. Build the short timeline

Dates can be exact, approximate, or marked as uncertain.

DATE / TIME RANGE	WHAT I OBSERVED OR WAS TOLD	IMPACT / UNCERTAINTY

WHAT CHANGED OVERALL

4. Medicines, tests, and details

Copy important names and doses from authoritative labels or records.

CURRENT MEDICINES AND SUPPLEMENTS

NAME	DOSE / TIMING AS RECORDED	CHANGE OR QUESTION

REPORTS OR RESULTS TO BRING

- ☐ Medication list
- ☐ Recent test reports
- ☐ Relevant letters
- ☐ Symptom timeline
- ☐ Photos or device notes
- ☐ Other:

DETAILS I NEED TO VERIFY

Keep guesses out of the final brief. Put uncertain names, dates, doses, or results here to check.

5. Prioritise the questions

Put the question you most want answered first.

OPTIONAL NEUTRAL PROMPTS

- ☐ What are the most useful next steps to clarify or manage this concern?
- ☐ What are we prioritising today, and what may need another appointment?
- ☐ What should I monitor or write down before follow-up?
- ☐ What changes should prompt me to contact the care team, and how?
- ☐ Who owns the next step, and when should I expect it?

1

2

3

4

5

6. Reflect on a flare

Record observations in sequence; possible patterns are questions, not proven causes.

BEFORE

Baseline, sleep, activity, stressors, routine or exposure changes

DURING

Onset, symptoms, intensity, duration, and what became harder

AFTER

Recovery time, residual effects, and return toward baseline

A PATTERN I MIGHT TRACK NEXT TIME — WITHOUT ASSUMING CAUSE

7. Leave with the next step

Write it in your own words, then check anything unclear with the care team.

WHAT WAS AGREED

NEXT ACTION

WHO OWNS IT

WHEN

HOW I WILL FOLLOW UP

BEFORE I FINISH

- ☐ I asked my top question
- ☐ I understand the next step
- ☐ I know who is responsible
- ☐ I noted the date or timeframe
- ☐ I know how to ask for clarification
- ☐ I know how to seek help if things change

ONE-SENTENCE AFTER-VISIT SUMMARY
